can the grease kit now through January.

F.O.G. Clogs Pipes

Follow these simple steps to help prevent sewer backups:

1. Pour cold fats, oils and grease into a covered, disposable container and throw it into your garbage. Never pour fats, oil, or grease down sink drains or toilet.

Coloque las grasas y los aceites frios en un contenedor desechable y con tapa y tirelo a la basura. Nunca tire las grasas en los drenajes de su casa.

2. Soak up spilled oils and grease with an absorbent material such as paper towels or kitty litter and throw into your garbage.

Absorba las grasas y los aceites restantes con un material absorbente como servilletas de papel y tirelos junto con su basura.

3. Before you wash dishes, scrape food scraps, fats, oils and grease into your garbage.

Antes de lavar los platos, tire los restos de alimentos, grasas y aceites en la basura.

4. Use sink strainers to catch any remaining food waste while washing dishes.

Utilice coladores para fregaderos al lavar los platos para atrapar los restos de comida restantes.
